

## **Collaborative Values Inventory: What Do We Believe about Alcohol and Other Drugs, Services to Children and Families and Dependency Courts?**

Many collaboratives begin their work without much discussion of what their members agree or disagree about in terms of underlying values. This questionnaire is a neutral way of assessing how much a group shares ideas about the values that underlie its work. It can surface issues that may not be raised if the collaborative begins its work with an emphasis on programs and operational issues, without addressing the important values issues affecting their work. Learning that a group may have strong disagreements about basic assumptions that affect its community's needs and resources may help the group clarify later disagreements about less important issues which are really about these more important underlying values.

After reviewing the results from a collaborative's scoring of the Inventory, it is important to discuss the areas of common agreement and divergent views. That discussion should lead to a consensus on principles that the collaborative members agree can form the basis of state or local priorities for implementing practice and policies changes, leading to improved services and outcomes for families.
